SCOTT BROOKS

Software Developer – I have worked in many aspects of technology throughout my career. I am searching for the opportunity to bring my experience with programming and technology, to a Software Development position. I am looking to gain employment with companies that incorporate continued learning, critical thinking, problem solving, and leadership advancement opportunities. My work experiences have given me the skills needed to expand into software development. With my attention to detail, and heightened sense of creativity I will be a huge asset to any company.

SKILLS

Visual Studio   Github/Git   C#   HTML/ CSS   UnitTesting   Postman   Agile

PROJECTS

Movie Streaming

A streaming service website that has user roles and admin roles. It is a work in progress.

Basketball Stats API

This code can be used to track team, player, and game statistics for a basketball league, such as the NBA.

Hangman

It is a simple hangman game. There is a set number of words, and is randomly selected to be the secret word.

My Portfolio

This is a project that is currently being updated throughout our class at Eleven Fifty Academy when different projects are completed.

[Static Website](#)

This is a static website staged as a storefront that we completed in class at Eleven Fifty Academy.

ACHIEVEMENTS / EDUCATION

Eleven Fifty Academy, Fishers, IN.

Jan 2020 - April 2020

Worked hard to develop a skill set that lends me as a highly sought-after candidate in this role.

- Applied best practices of software development
- Tested features across multiples browsers
- Fixed bugs when encountered

Eleven Fifty Academy - [Software Development Gold Badge](#) - The earners of Software Development Gold Badge learn fundamentals of C#, CSS, and HTML. Learners show ability to meet deadlines and complete a series of business challenges covering C# and Object Oriented Programming fundamentals.

Eleven Fifty Academy - [Software Development Blue Badge](#) - Earners of .NET Blue Badge build a full-stack web application using Microsoft's ASP.Net Entity Framework Web MVC. The project has at least three relational SQL tables that connect to a layered backend application with Business, Data, and Presentation layers.

Eleven Fifty Academy - [Software Development Red Badge](#) - Earners of Software Development Red Badge take all the skills they have learned in the previous badges and work individually to create a full stack web application with .NET framework MVC and Razor Earners work as a to plan sprints, execute daily stand ups, manage Git, intro to SOLID, and resolve issues with group dynamics.

Fiber Optic Certification - Week long class that goes into extreme detail all about fiber optic cables.

EXPERIENCE

Metronet Inc., Westfield, IN — *Broadband Technician*

2018 - Jan 2020

Work closely with customers on their internet, TV, phone service. Installed fiber optics to customer premise. Install and repair troubleshooting, as well as cable splicing and repair.

- Resolve fiber optic systems
- Repair fiber optic cables/systems
- Install fiber optic services

Frontier Communications, Tampa, FL. — *Fiber Technician*

Aug 2005 - Dec 2017

Worked with fiber technician installers to bury cables, as well with internal customers. Assess all of the cables to be sure they are stable, repair if needed.

- Repair fiber and copper cables
- Light machine operator
- Locate buried cables

Geico, Lakeland, FL. — *Customer Service Rep*

Jan 2004 - Aug 2005

Worked closely with new or current customers while making changes to their auto policies. Customer Care Retention.

- Assist customers with making changes to auto policies
- Setup new auto policies to new clients
